Excavation and Trenching Competent Person – 7 hours

In this course, students will learn about the role and responsibility of a competent person to oversee excavation and trenching activities on a job site and will be given the knowledge to perform the work properly. Some of the topics taught include the understanding and application of definitions relating to OSHA's Excavation Standard (Subpart P), excavation hazards and control measures, soil analysis techniques, protective system requirements and emergency response. This course fulfills the OSHA Excavation competent person requirement. It is the responsibility of the student's employer to assign or approve student as an authorized person for their site at the completion of this course.

Training available at Safety Council of the Texas Mid-Coast or at your workplace!
