

06MEWPAB

MEWP Combination (Aerial Lifts) – 7 hours

This course will train on MEWP Groups A & B, Type 3. Instruction includes both classroom theory and hands-on practical training with full equipment inspection and skills assessment. Topics include stability and capacity characteristics, center of gravity, fall protection and PPE, platform limitations, boom lift and working around people and equipment. The employer shall instruct each employee in the recognition and avoidance of unsafe conditions and the regulations applicable to his/her work environment to control or eliminate any hazards or other exposure to illness or injury.

DESCRIPTIONS: Group A: platforms that move vertically but stay inside the tipping lines. Group B: typically boom-type where platform extends past chassis. Type 1: can only be driven in stowed position. Type 2: can be driven elevated but is controlled from chassis. Type 3: can be driven elevated but is controlled from work platform.

Training available at Safety Council of the Texas Mid-Coast or at your workplace!
